AI Workforce OS for CPAs and accounting firms. Survive tax season.
Stop chasing clients for docs. Get partners back to advisory work.

1. One-page outline

Headline: AI Workforce OS for CPA Firms

Sub: Hire AI employees that onboard clients, chase missing docs, prep filings, and surface review-ready returns — so partners do advisory work, not admin work.

The 3 wins:

- Tax-season pressure cut by 35% (measured in partner hours)
- Missing-doc chase from 6 days to 24 hours
- Reconciliation discrepancies surfaced in real-time

Star employee: AI Client Intake — onboards new clients, gathers prior-year returns, sends doc checklists, and tracks returns. Memory-backed by service tier + state-specific rules.

The roster (4 AI employees):

Role	What it does	Memory source
Client Intake	Onboard + doc checklist	Service tier + state rules
Doc Chase	Adaptive missing-doc cadence	Engagement letter + client history
Reconciliation Watch	Discrepancy flagging	Bookkeeping ledger + bank feeds
Review Prep	Return assembly for partner review	Past returns + this-year docs

The CTA:

1. Live demo: mission.baselineautomations.com/?demo=cpa
2. \$1, 14-day pilot
3. Convert at \$299/mo Team or \$799/mo for multi-partner firms

2. Sales sheet

Tax season doesn't break firms because the work is hard. It breaks firms because of coordination: 200 clients, each missing 3 docs, each blocking a return.

Baseline deploys four AI employees:

- AI Client Intake runs onboarding. Engagement letter, doc checklist, prior-year request — all sent and tracked the same day the client signs.
- AI Doc Chase runs the missing-doc cadence. Adaptive: text → email → call. State-specific language. Pilot data: 6 days → 24 hours.
- AI Reconciliation Watch reads the bookkeeping ledger as it comes in and surfaces discrepancies before they hit your desk. Client #88's 1099 mismatch is yours to approve, not yours to find.
- AI Review Prep assembles returns. Partner sees a stack ready for review, not a stack of half-built files.

Mission Control supervises. Every client communication waits for the partner's approval. Every memory call cites the engagement letter or the bookkeeping line.

Trial: \$1 / 14 days. Tier: \$299/mo (single partner) / \$799/mo (multi-partner). Independent of CPA practice software.

3. Discovery script

1. How many active 1040 / 1120 / 1065 clients does the firm carry?
 2. How many partners + staff are on the team?
 3. Tax season pain — quantify in hours per partner per week from Feb 15 to April 15.
 4. Who chases missing docs today?
 5. What's your current practice software? (UltraTax, Lacerte, Drake, CCH, etc.)
 6. What's your bookkeeping stack? (QBO, Xero, Sage)
 7. How are you doing reconciliation reviews — sample, full, or skip?
 8. Last filing that went over deadline — what was the missing piece?
 9. What % of clients are on a fixed-fee engagement vs. hourly?
 10. \$1, 14-day pilot for one staff member on a 20-client subset?
-

4. Objection handling

Objection	Response	Proof
"We're a relationship business."	"AI handles the admin. Partners get more time for the relationship, not less. The client gets faster turnaround."	Show partner-time savings
"We can't have AI talking to clients."	"AI drafts; partner approves. Every touch logged. Same compliance posture as your assistant."	Approval queue
"UltraTax / Lacerte does this."	"Practice software does the return. We do the coordination <i>around</i> the return — intake, doc chase, recon review, partner prep."	Demo the workflow gap
"Tax season is once a year — not worth it."	"It's once a year for partners. It's 12 months a year for the staff chasing 1099s and corrected K-1s. Reconciliation Watch runs monthly."	Show year-round value
"We tried automation — clients hated it."	"Adaptive cadence with partner-approved copy. No 'press 1 for' loops. We A/B'd this in pilot."	Sample copy
"Data sensitivity — IRS, state."	"Encryption in transit + at rest, full audit log per touch, memory citations cite the source doc, SOC 2 path in progress. We will sign a customer-specific addendum for state regulators."	Security doc

5. Follow-up sequence

Day	Channel	Asset
0	Email	Recap + signed demo + security one-pager
1	SMS	Demo nudge
3	Email	"How a 6-partner CPA firm cut tax-season hours 35%"
5	LinkedIn	Light touch
7	Email	Slot ask
10	SMS	Last SMS
14	Email	Pilot proposal + data security addendum
21	Email	"Survived tax season? Let's talk about next year."

Baseline Automations

T+3 — Reference

Subject: {{reference_firm}} cut tax-season hours 35%

{{first_name}} –

{{reference_firm}}, 6 partners + 14 staff in {{state}}.

After their 14-day pilot + 90 days on Team plan:

- Partner tax-season hours: -35%
- Missing-doc cycle: 6d → 24h
- 11 reconciliation issues surfaced before partner saw them

Same firm shape as yours. Walk their workspace?

– {{rep_name}}

T+7

Subject: 15 minutes this week, {{first_name}}?

You quoted ~{{partner_hours}}/wk of partner time burned on admin during tax season. At \${{partner_rate}}/hr, that's \${{annual_loss}}/year before opportunity cost.

\$1, 14 days. If we don't measurably reduce admin hours, you walk.

T+14 — Pilot proposal

Subject: 14-day pilot for {{firm}} – proposal

{{first_name}} –

Pilot one-pager + data security addendum attached.

- Day 0: Kickoff + 20-client subset chosen
- Day 4: AI Doc Chase live on those 20
- Day 5: First chase cycle complete
- Day 13: Partner-hour reduction reported

\$1 today. \$299 or \$799/mo on conversion (per firm size).

7. SMS templates

(Partner-initiated; client SMS opt-in flow is separate.)

T+1

Hi {{first_name}} – recap on the AI Doc Chase for {{firm}}.
Signed demo: {{short_link}}. STOP to opt out.

T+4

Following up on the AI workforce for {{firm}}. 15-min call this week? {{calendar_short}}. STOP.

T+8

Last nudge. Pilot proposal or shelve until after tax season? Reply BACK or STOP.

Reference ROI math

Active clients	Partner hours saved / season	\$ saved @ \$250/hr partner rate
50	80	\$20,000
200	320	\$80,000
500	800	\$200,000
1000+	1600+	\$400,000+

Plus reconciliation issues caught before they became corrected returns.
