Generated: 2026-05-29

AI Workforce OS for general contractors. Bid faster. Sub-coordinate without the daily phone tag. Permit-track without the spreadsheet.

1. One-page outline

Headline: AI Workforce OS for General Contractors

Sub: Hire AI employees that draft estimates, coordinate subs, and track permits — so you can run the business, not chase it.

The 3 wins:

- Estimates out same day (vs. 4–7 day industry average)
- Sub coordination cut from 2 hours/day to 15 minutes
- Permit + change-order tracking with zero spreadsheets

Star employee: AI Bid Estimator — turns plans + scope into a priced bid with margin check and material lead-times included. Memory-backed by past bids, material price feeds, and trade SOPs.

The roster (4 AI employees):

Role	What it does	Memory source
Bid Estimator	Estimate drafts + margin check	Past bids + material prices
Sub Coordinator	Dispatch + status check-ins	Sub roster + project log
Schedule Planner	Crew + dependency mapping	Active project plans
Permit Tracker	Submissions + inspection prep	Jurisdiction rules + permit log

The CTA:

1. Watch the live demo: mission.baselineautomations.com/?demo=gc
2. \$1, 14-day pilot
3. Convert at \$299/mo

2. Sales sheet (~250 words)

General contractors lose deals two ways: estimates take too long, or sub coordination falls apart mid-project. Both are coordination problems, not skill problems.

Baseline deploys four AI employees:

- AI Bid Estimator drafts the estimate from your plans, your past bids, and live material pricing. Margin is checked before it hits your inbox. Same-day estimates are normal.
- AI Sub Coordinator runs the daily status pulse. Who's on-site, who's late, who's blocked, who needs a PO. You get one digest, not 14 phone calls.
- AI Schedule Planner keeps the project plan current. When a trade slips, it re-flows the downstream dependencies and surfaces the new critical path.
- AI Permit Tracker files, tracks, and preps inspections per jurisdiction. No more "I thought you pulled it."

Mission Control supervises. Every estimate, every change-order, every permit submission waits for your approval. Every AI action cites the doc it came from.

Trial: \$1 / 14 days. Tier: \$299/mo. Demo:

mission.baselineautomations.com/?demo=gc .

3. Discovery script

1. How many active projects are you running right now?
 2. How long does it take you to turn a request into a signed bid? (4–7 days is normal — anything more is acute pain)
 3. Who answers the phone when a sub is late?
 4. Walk me through the last project where coordination broke. What happened, what did it cost?
 5. What do you use today — Buildertrend, ProCore, CoConstruct, none?
 6. Are you doing change orders by email or in a system?
 7. How often do permits surprise you?
 8. What's your margin on the average \$200k job, and where do you lose points?
 9. If you had a sub coordinator running 24/7 for \$299/mo, would you keep them?
 10. If we ran your last completed project through Mission Control in a 14-day pilot for \$1, would you want to see the result?
-

4. Objection handling

Objection	Response	Proof
"We already use Buildertrend / ProCore."	"Keep using it. Mission Control sits on top and runs the workforce that updates it."	Demo the integration
"Subs don't text — they call."	"AI Sub Coordinator calls them. Voice-first. If they prefer SMS, it shifts. The data lands in your dashboard either way."	Demo the voice flow
"Estimates need a human."	"Estimates need a human approver. Drafting them is a \$30/hr job. AI Bid Estimator drafts; you approve. You spend 5 minutes instead of 90."	Show the draft + approve flow
"I tried AI — it made up materials."	"Memory citations. Every line item points to your bid history or the current material feed. If it's wrong, you see why before you send."	Open a memory citation card
"I'm too small for this."	"Smaller crews benefit more, not less. You're the dispatcher, the estimator, and the owner. Pick one to offload first."	Pricing page
"Permits are state-specific — you can't know them."	"We index the jurisdiction rules you feed us. Memory-backed. If you operate in Cook County, AI Permit Tracker reads Cook County rules."	Show the permit memory

5. Follow-up sequence

Day	Channel	Asset
0	Email	Recap + signed demo link
1	SMS	Demo nudge
3	Email	"How a 12-crew GC cut estimate cycle from 6 days to 1"
5	LinkedIn	Light touch
7	Email	3-slot call ask
10	SMS	Last SMS
14	Email	Pilot proposal
21	Email	90-day re-engage

6. Email templates

T+0 — Recap

Subject: AI workforce recap for {{company}}

{{first_name}} –

Three things to revisit from today:

- 1) AI Bid Estimator drafting a {{recent_project_type}} estimate in 12 minutes with margin checked.
- 2) AI Sub Coordinator's daily pulse running while you were on the call.
- 3) AI Permit Tracker flagging the {{jurisdiction}} window before it slipped.

Your signed demo link (expires 7 days):
{{signed_demo_link}}

14-day pilot, \$1, your last project:
{{calendar_link}}

– {{rep_name}}
Baseline Automations

T+3 — Reference story

Subject: {{reference_gc}} cut estimate cycle 6d → 1d

{{first_name}} –

{{reference_gc}} runs 12 active jobs in {{city}}. Estimate cycle was the bottleneck.

90 days after the pilot:

- Estimates out same day
- Sub coordination 90 min/day → 15 min/day
- \$84k recovered AR from change orders that previously got missed

Same setup as you. Want to walk their workspace?
{{calendar_link}}

– {{rep_name}}

T+7

Subject: 15 minutes this week, {{first_name}}?

You said the last broken project cost ~\${{lost_dollars}}.

\$1 pilot, 14 days. If we don't show measurable cycle-time reduction, you walk.

Slots:

- {{slot_1}}
- {{slot_2}}
- {{slot_3}}

- {{rep_name}}

T+14 — Pilot proposal

Subject: 14-day pilot for {{company}} – proposal

{{first_name}} –

Pilot proposal attached.

Day 0 kickoff → Day 5 first estimate drafted → Day 13 ROI review.

\$1 today. \$299/mo or walk at day 14.

– {{rep_name}}

7. SMS templates

T+1

Hi {{first_name}} – quick recap on the AI Bid Estimator. Signed demo for {{company}}: {{short_link}}. Reply STOP to opt out.

T+4

Following up on the AI workforce for {{company}}. 15-min call this week? {{calendar_short}}. Reply STOP.

T+8

Last nudge. Pilot proposal or shelf till next quarter? Reply BACK or STOP.

Reference ROI math

Active jobs	Hours saved / week	\$ saved / year @ \$50/hr
3 jobs	8	\$20,800
8 jobs	18	\$46,800
15 jobs	32	\$83,200
30 jobs	65	\$169,000

Plus margin recovered on change-orders surfaced by AI Permit Tracker — typically 1–3 points on every active project.
