

BASELINE AI WORKFORCE OS

Marketing Agency — Sales Playbook

Mission Control supervises · Baseline OS coordinates · Hermes / OpenClaw / Claude Code execute

Document: `playbook-marketing-agency.pdf`

Source: `docs/sales/marketing-agency.md`

Generated: 2026-05-29

AI Workforce OS for marketing, creative, growth, paid-ads, content, and social agencies. Install AI employees that produce content, follow up with leads, prepare client updates, and generate ROI reports — without hiring another account manager.

1. One-page outline (print-to-PDF ready)

Headline: AI Workforce OS for Marketing Agencies

Sub: Hire AI employees that run campaigns, fill the content calendar, chase leads, and prep client updates — so account managers manage accounts, not admin.

The 3 wins:

- Weekly client report drafted before the AM opens their laptop
- Content calendar full 30 days out, never empty
- 24/7 lead follow-up — no more "we got busy and dropped the ball"

Star employee: AI Campaign Operator — drafts campaign briefs from the client's offer, target audience, and last quarter's results.

Memory-backed by the campaign archive + brand book + performance log.

The roster (5 AI employees):

Role	What it does	Memory source
Campaign Operator	Brief drafts + creative routing + QA	Brand book + campaign archive
Content Calendar Manager	30-day content runway + asset tracking	Editorial calendar + brand voice
Client Success Assistant	Status updates + meeting prep + recaps	Client folder + project plan
Reporting Analyst	Weekly + monthly client ROI reports	Ad platform data + KPI sheet
Lead Follow-Up Agent	Inbound + cold pipeline cadence	CRM + offer library

The ROI line: AM capacity up 40%. Reporting time -85%. Content gaps closed. Lead follow-up cadence runs 24/7. Conversion lift on inbound 18-32% within 60 days.

The CTA:

1. Live demo: mission.baselineautomations.com/?demo=marketing-agency
2. \$1, 14-day pilot (one test client account)
3. Convert at \$299/mo Team or \$799/mo Workspace (multi-client)

Footer: Mission Control supervises · Baseline OS coordinates ·
Hermes / OpenClaw / Claude Code execute · No live customer data in demos.

2. Sales sheet (~280 words)

Marketing agencies don't have a creative problem. They have a throughput problem. Reports take a day. Content calendars run empty. Inbound leads sit until Tuesday. Account managers spend 60% of their week on admin, then bill the client for strategy.

Baseline deploys five AI employees who work alongside the agency team:

- AI Campaign Operator drafts the campaign brief, routes creative to the right designer, and runs QA against the brand book before anything hits an ad account. Same-day campaign turnaround is normal.
- AI Content Calendar Manager keeps the 30-day calendar full. Pulls hooks from past winners. Schedules posts. Flags gaps before the client does.
- AI Client Success Assistant drafts the weekly status, preps the meeting deck, writes the recap. The AM opens their laptop and the client update is already drafted in their voice.
- AI Reporting Analyst pulls from every ad platform you run (Google, Meta, TikTok, LinkedIn) and drafts the client ROI report — KPIs, deltas, plain-language analysis. Monthly reports go from 4 hours to 12 minutes of review.
- AI Lead Follow-Up Agent runs adaptive cadence on every inbound. 4 touches over 10 days. Hands off warm leads to the AM.

Mission Control supervises. Every client-facing communication waits for AM approval. Every memory call cites the brand book, the performance log, or the engagement letter.

Trial: \$1 / 14 days on one test client account. Tier:
\$299/mo Team (single agency, up to 5 client workspaces) /
\$799/mo Workspace (up to 25 client workspaces).

3. Discovery script (10 questions)

1. How many active client accounts is the agency running?
2. What service lines — paid, SEO, content, social, full-funnel?

3. How long does a weekly client report take an AM to produce today? (Honest hours)
4. Who fills the content calendar? Account manager, content lead, contractor, nobody?
5. What's your average client MRR?
6. What's the AM-to-client ratio today? (Looking for: pain at 1:8 or worse)
7. Inbound lead follow-up — automated, manual, dropped?
8. What ad platforms + tools do you run on? (Google / Meta / TikTok / LinkedIn / HubSpot / etc.)
9. Last client churn — root cause? (Looking for: "communication", "reporting", "they felt ignored")
10. \$1, 14-day pilot on one test client account?

Yes to #10 → demo within 48 hours. Anything less → sales sheet
+ recorded demo, follow-up at T+5.

4. Objection handling

Objection	Response	Proof
"Our AMs are the relationship — clients want them."	"AI drafts; AM approves and sends in their voice. Clients see the AM, not the AI. The AM gets 4 hours of their week back to actually talk strategy."	Show client-facing draft → AM approval flow
"We tried ChatGPT for content. It sounded like ChatGPT."	"AI Content Calendar Manager pulls from the client's brand book and past winners. Voice is memory-cited, not generic. Test it on your worst client and see."	Memory citation card on a content draft
"Reporting is custom per client."	"AI Reporting Analyst learns each client's KPI set in week 1. The template is shared; the report is bespoke. Watch a 4-client run side-by-side."	Demo the reporting output
"Ad accounts have permission complexity."	"We read; we don't write to ad platforms without approval. AI Reporting Analyst pulls metrics. Campaign changes wait for the AM."	Show the ad-platform read-only mode
"We already use Slack + Notion + Asana."	"Keep them. Mission Control sits on top and runs the AI workforce <i>across</i> them. We update Notion the way your AM does."	Demo the integration writes
"Leads are sales' job, not delivery."	"AI Lead Follow-Up runs the cadence; your sales team closes. Worst case it covers nights and weekends. Pilot data: 18-32% conversion lift on inbound."	Show the cadence + handoff
"Multi-client memory — won't they bleed into each other?"	"Per-client workspace ID, per-client memory namespace, per-client approval queue. Audited per touch. One client never sees another."	Show workspace isolation
"We're a 3-person agency — too small."	"Smallest agencies benefit fastest. The founder is the AM, the strategist, and the closer. Pick one to offload first."	Pricing + Team plan

5. Follow-up sequence (14-touch over 21 days)

Day	Channel	Asset
0	Email	Recap + signed demo link + ROI calculator link
1	SMS	Quick nudge (template T+1)
3	Email	"How a 9-client agency cut reporting from 4h to 12min"
5	LinkedIn DM	Comment on a recent post + soft share
7	Email	"Worth a 15-min next step?" with 3 time slots
10	SMS	"Last nudge — your call"
14	Email	Pilot proposal + per-client cost math
21	Email	90-day re-engage

Stop the sequence on: meeting booked · explicit no · 3-month re-engage opt-in · unsubscribe.

T+0 — Demo recap (sent within 1 hour of demo)

Subject: AI workforce recap for {{agency}}

{{first_name}} -

Three things from today's walkthrough you'll want to revisit:

- 1) AI Campaign Operator drafting a {{test_client}} campaign brief in 6 minutes - brand-book compliant.
- 2) AI Reporting Analyst pulling a full {{platform}} weekly report on the test account while we were on the call.
- 3) AI Content Calendar Manager filling the gaps on {{test_client}}'s next 30 days.

Here's your private demo link (signed, expires in 7 days, watermarked for {{agency}}):

T+3 — Reference story

Subject: How {{reference_agency}} cut reporting from 4h to 12min

{{first_name}} -

Quick story: {{reference_agency}}, 9 client accounts, 3 AMs in {{city}}. Reporting Friday was eating their entire afternoon.

After 90 days with Baseline:

- Weekly reporting: 4h/client → 12min review
- AM-to-client ratio: 1:3 → 1:7 (same headcount)
- Inbound lead conversion: +24% on adaptive follow-up

Same agency shape as {{agency}}. Walk their workspace on a 15-min call?
{{calendar_link}}

- {{rep_name}}

T+7 — Direct ask

Subject: 15 minutes this week, {{first_name}}?

You said reporting eats ~{{reporting_hours}}h/week per AM. At {{am_count}} AMs and \${{am_cost}}/hr loaded cost, that's \${{annual_loss}}/year in admin that should be billable.

\$1, 14-day pilot on one client account. If we don't measurably shrink reporting time and surface conversion lift, you walk.

Slot this week?

- {{slot_1}}
- {{slot_2}}
- {{slot_3}}
- {{rep_name}}

T+14 — Pilot proposal

Subject: 14-day pilot for {{agency}} – proposal + per-client math

{{first_name}} –

Pilot one-pager attached. The shape:

- Day 0: 45-min kickoff + test client picked
- Day 4: AI Reporting Analyst live on the test client
- Day 5: First weekly client report drafted by AI
- Day 7: Week-1 review
- Day 11: AM-capacity lift measured
- Day 13: Per-client cost math + upgrade conversation

Per-client cost on Workspace tier (25 clients) $\approx$ \$32/mo.
Cheaper than a contractor's lunch budget.

\$1 today. \$299 (Team) or \$799 (Workspace) on conversion.

7. SMS templates

All TCPA-compliant; sent only after explicit opt-in on the discovery call. STOP and HELP keywords supported. Frequency cap 3/prospect.

T+1

Hi {{first_name}} – recap on the AI Reporting Analyst we walked through. Signed demo link for {{agency}}: {{short_link}}
Reply STOP to opt out.

T+4

Following up on the AI workforce for {{agency}}. Worth a 15-min call this week? {{calendar_short}}
Reply STOP to opt out.

T+8 (last SMS in the cadence)

Last nudge – happy to send a pilot proposal or shelf this until next quarter, your call. Reply BACK to talk or STOP to opt out.

Reference ROI math (for the one-pager)

Active clients	AM hours saved / wk	\$ saved / year @ \$75/hr loaded
5	18	\$70,200
10	38	\$148,200
25	95	\$370,500
50+	195+	\$760,500+

Plus inbound conversion lift — typically +18-32% on adaptive follow-up cadence — which converts directly to net new MRR. Numbers based on staging pilot cohort; update once production agency pilots close.
