Generated: 2026-05-29

AI Workforce OS for mortgage brokers and lenders. Cut doc cycle.
Stop closing-day chaos. Keep every borrower informed.

1. One-page outline

Headline: AI Workforce OS for Mortgage

Sub: Hire AI employees that collect docs, coordinate loans, quote rates, and surface appraisal exceptions — so closings never slip.

The 3 wins:

- Doc collection cycle 7 days → 36 hours
- Closing-day prep done the day before, not at 9pm the night of
- Appraisal exceptions surfaced in real-time (not at funding)

Star employee: AI Doc Collection Assistant — chases every missing W-2, bank statement, gift letter with adaptive cadence and compliance-clean copy. Memory-backed by the loan file + state regs.

The roster (4 AI employees):

Role	What it does	Memory source
Doc Collection	Chase missing docs	Loan file + state rules
Loan Coordinator	Pipeline + milestone tracking	Loan stages + lender rules
Rate Quote Bot	Pre-qual rate quotes	Rate sheet + product matrix
Underwriting Watch	Exception flagging	Underwriting guidelines

The CTA:

1. Live demo: mission.baselineautomations.com/?demo=mortgage
2. \$1, 14-day pilot
3. Convert at \$299/mo

2. Sales sheet

Closings slip on one thing: a missing doc, an unflagged appraisal exception, or a borrower who didn't know they had a deadline.

Baseline deploys four AI employees:

- AI Doc Collection chases every missing piece. Adaptive cadence (text first, then email, then call), state-specific compliance, borrower-friendly copy. The doc cycle drops from 7 days to 36 hours in pilot data.
- AI Loan Coordinator keeps the pipeline current. Borrower knows the next step. Lender knows the next deadline. You know what's at risk.
- AI Rate Quote Bot takes pre-qual inquiries 24/7, pulls from the live rate sheet, and books a follow-up with the LO.
- AI Underwriting Watch reads the file as it builds and flags exceptions before they hit the UW desk — appraisal low, DTI drift, missing reserves.

Mission Control supervises. Every borrower communication waits for the LO's approval. Every memory call cites the loan file or the state regulation.

Trial: \$1 / 14 days. Tier: \$299/mo. GLBA + state regs in scope from day one.

3. Discovery script

1. How many active loans is your team running?
 2. What's your average doc collection cycle right now?
 3. Who chases borrowers for docs — LO, assistant, no one?
 4. How often do closings slip, and what's the most common cause?
 5. Inbound rate inquiries — handled by LO, assistant, or auto?
 6. LOS — Encompass, Calyx, Floify, Arive, other?
 7. How are you handling state-specific compliance language?
 8. What's your average revenue per closed loan?
 9. Last loan that slipped — what was the chain of events?
 10. \$1 pilot for 14 days on your live pipeline?
-

4. Objection handling

Objection	Response	Proof
"Compliance — AI can't talk to borrowers."	"AI drafts; LO approves. State-specific copy reviewed before send. Audit trail per touch. Cleaner than a junior LOA texting unmonitored."	Show approval queue + audit log
"Encompass / Calyx already does pipeline."	"Pipeline tracking ≠ pipeline acceleration. AI Loan Coordinator chases the gaps; Encompass shows the gaps. Different jobs."	Demo the chase flow
"Borrowers don't text."	"Pilot data: 74% prefer SMS. Adaptive cadence falls back to email + call if SMS isn't responsive."	Show channel waterfall
"Rate quotes are LO work."	"Quotes are LO sign-off. Drafts are \$20/hr work. AI drafts in 30 seconds; LO approves."	Quote drafting flow
"Our compliance officer will block this."	"Bring them in early. Audit log + memory citations + approval gates are exactly what they want to see. We've shipped under GLBA + state regs in the pilot cohort."	Send security doc
"We tried a chatbot — borrowers hated it."	"Chatbot ≠ AI workforce. AI Doc Collection is a 4-touch sequence with human handoff. Not a 'connecting you to an agent' loop."	Demo

5. Follow-up sequence

Day	Channel	Asset
0	Email	Recap + signed demo + compliance one-pager
1	SMS	Demo nudge
3	Email	"How a 12-LO branch cut doc cycle to 36 hours"
5	LinkedIn	Light touch
7	Email	Slot ask
10	SMS	Last SMS
14	Email	Pilot proposal + GLBA addendum
21	Email	90-day re-engage

6. Email templates

T+0 — Recap

```
Subject: AI workforce recap for {{branch}}

{{first_name}} -

Three things from today:

1) AI Doc Collection chasing the missing {{doc_type}} on
   {{borrower}} - borrower-friendly, state-clean copy.
2) AI Underwriting Watch flagging the {{flag_type}} before it
   hit the UW desk.
3) AI Loan Coordinator's daily pipeline pulse running while we
   talked.

Baseline Automations
```

T+3 — Reference

```
Subject: {{reference_branch}} cut doc cycle to 36 hours

{{first_name}} -

{{reference_branch}}, 12 LOs in {{state}}. Was averaging
7-day doc cycles, 1-in-5 closings slipping.

After 90 days with Baseline:
- Doc cycle: 7d → 36h
- Closing slip rate: 20% → 4%
- Borrower NPS up 18 points

Same setup as your branch. Walk their workspace?

- {{rep_name}}
```

T+7

Subject: 15 minutes this week, {{first_name}}?

You said the average slipped closing costs you ~\${{slip_cost}} in carry + relationship damage.

\$1, 14-day pilot. If we don't measurably reduce doc cycle, you walk.

7. SMS templates

(LO-initiated only; borrower opt-in flow is separate.)

T+1

Hi {{first_name}} – recap on the AI Doc Collection Assistant for {{branch}}. Signed demo: {{short_link}}. STOP to opt out.

T+4

Following up on the AI workforce for {{branch}}. 15-min call this week? {{calendar_short}}. STOP.

T+8

Last nudge. Pilot proposal or shelve until next quarter? Reply BACK or STOP.

Reference ROI math

Loans / month	Doc cycle savings	\$ saved / year @ \$4k/loan margin
10	2 closings rescued	\$96,000
25	5 closings rescued	\$240,000
50	11 closings rescued	\$528,000
100+	22+ closings rescued	\$1,056,000+

Rescues = loans that would have slipped past the lock-in window.
